

2.1. Latinsk navn (Latin name)

Pyrola media Sw

2.2 Røddlistestatus (red list status)

Not in red list

2.3 Utbredelse (spreading/place)

Northern and central Europe, extending southwards locally, and mainly in the mountains, to N. Italy, Macedonia, Krym, and S.Ural.

2.4 Lokalteter i Norge (locations in Norway)

2.4.1. Lokalteter i Oslo (locations in Oslo)

2 locations

Location 1. Maridalen.

Individer: 4 blomstrende individer.

Areal: 3 x 4 m.

Miljø: I slåtteeng ved åkerkant.

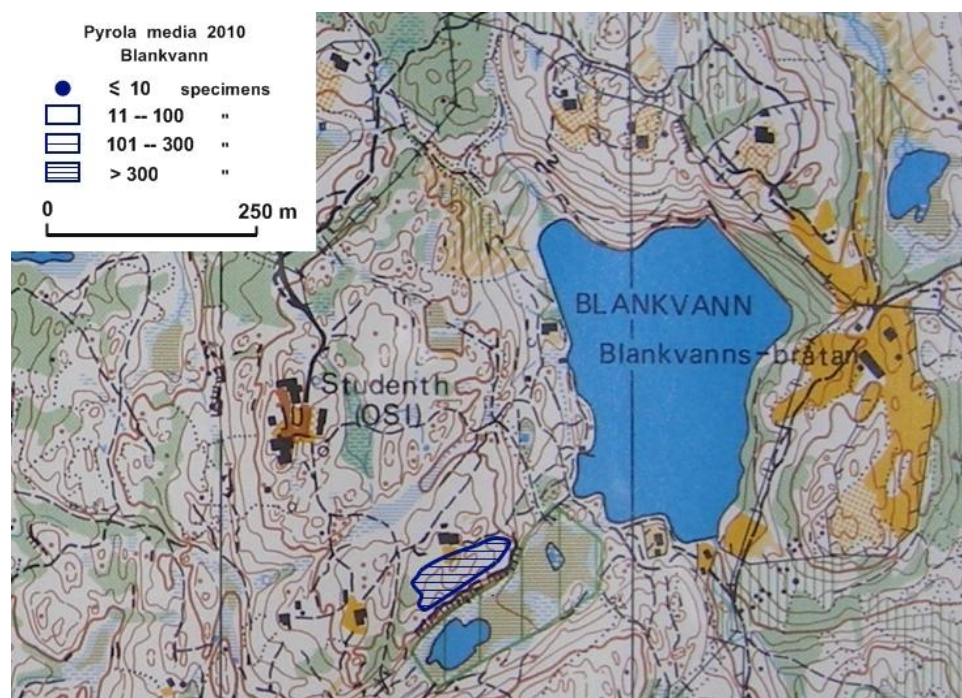

Tilstand: Stabil.

Overvåkningsdato: 1.07.2010 (Tor Øystein Olsen, Torbjørn Røberg, Roman Gramsz)

Første gang funnet: 2004 av Tor Øystein Olsen.

Eier: Staten.

Location 2. Blankvann, Nordmarka.

Individuals: 110 flowering specimens + ca 400(+) vegetative

Area: 80 x 130m

Environment (habitat): Open surroundings of a cabin on the hill top. Mostly grassland on a shallow and rocky but fertile soil. With other species: *Anemone nemorosa*, *Briza media*, *Calamagrostis arundinacea*, *Convallaria majalis*, *Dryopteris filix-mas*, *Epipactis atrorubens* cfr., *Fragaria vesca*, *Galium boreale*, *Gymnadenia conopsea*, *Hepatica nobilis*, *Hieracium sect. hieracium*, *Juniperus communis*, *Listera ovata*, *Orthilia secunda*, *Pinus sylvestris*, *Polygala vulgaris*, *Potentilla erecta*, *Pyrola chloranth*, (photo 3479), *P. minor*, *P. rotundifolia*, *Rubus* sp., *Solidago virgaurea*, *Sorbus aucuparia*, *Vaccinium myrtillus*, *Vaccinium vitis-idaea*, *Viola* sp.

Condition: *Pyrola media* is growing in (about 10) concentrations, with a few to dozen or so flowering plants in each concentration. It is difficult to notice vegetative leaf rosette but in 7 concentrations we try to count precisely both flowering and vegetative rosettes:

- 10 flowerig/ 36 vegetative

- 19/ 42

- 12/ 62

- 12/ 63

- 11/ 44

- 6/ 50

- 14/ 54

So, proportion vary from 1: 2 to 1 : 8 depending on location and a difficulty with finding vegetative rosettes in dense vegetation.
